Podiatry Clinic

Providing assessment and treatment services
for adults and children

SERVICES

The UniSA Podiatry Clinic offers quality, affordable services by undergraduate podiatry students, under the supervision of registered practicing podiatrists

Clinical services include foot and lower limb assessment and treatment, biomechanics, sports injury, nail surgery and paediatrics (children).

We provide assessment and treatment of lesions of the skin and nails (e.g. corns, callus), treatment of foot infections (e.g. plantar warts, ingrown toenails), and foot care and footwear education.

Custom orthoses

Our custom orthoses are designed to support, align and improve the function of your feet and lower limbs. This service includes casting, one pair of custom orthoses, standard covers, dispensing, and a follow-up appointment.

Prefabricated insoles

Prefabricated insole prices vary and depend on the type and brand required.

SERVICES *cont.*

Biomechanics

We provide assessment and treatment of your feet and lower limb functions to identify and rectify the cause of pain.

Nail surgery

We assess and treat nail problems and infections, including the removal of ingrown toenails.

Services for children

We provide foot and lower limb assessment, as well as foot care and footwear education, for children 14 years and under.

A medical practitioner referral is not required to access our services.

Prices vary between student-delivered services and Registered Podiatrist services. Concession rates apply to those under 18 years, student and health care card holders.

Appointments are essential.

Please see Page 2 for contact details.

TEACHING & LEARNING

In addition to providing you with valuable patient care, the Clinic delivers quality clinical education to UniSA students — our next generation of healthcare professionals. Educated in state-of-the-art facilities, students gain invaluable practical experience and exposure to a wide range of client needs.

COMMUNITY CLINICS

UniSA also offers a range of other services for the community including:

- Allied Health
- Exercise Physiology
- Legal Advice
- Marketing
- Midwifery
- Occupational Therapy
