Microbial Imaging
Methods in Microbiology
Volume 54
Edited by Iva Savidge & Chantaline Podhilske

Recent advances in molecular technology have provided new microbial imaging tools, not only complementing more classical methods, but in many cases significantly enhancing the sensitivity and efficiency in which studies may be conducted. This volume emphasizes detailed methodology, provides a theoretical background and has potential applications of specific imaging tools.

December 2004, Paperback, 375 pp., \$58.95/£39.95/€34.95, ISBN: 0125215355
December 2004, Hardback, 373 pp., \$129.95/£84.95/€115.00, ISBN: 0125215347

Advances in Microbial Physiology
Volume 49
Edited by Robert K. Poole

This series has consistently presented a well balanced account of progress in microbial physiology, invaluable for teaching purposes.

AMERICAN SCIENTIST

Advances in Microbial Physiology continues to publish topical and important reviews, incorporating physiology in its broader context, to include all bacterial and eukaryotic forms, to our understanding of how microorganisms and their component parts work.

Volume Topics include:
* Gliauthione, Altraxin, Merabolite in Fungi
* The Role of the Flavodioxin Protein in Microbial Nitric Oxide Detoxification
* Stress Responsive Bacterial Bioenzymes as Environmental Monitors

October 2004, Hardback, 301 pp., \$149.95/£99.95/€135.00, ISBN: 0120277492

Stick Building Syndrome
Advances in Applied Microbiology
Volume 55
Edited by David C. Stams

'Stick Building Syndrome', SBS, is the term commonly used for symptoms resulting from problems with indoor air quality. This is the main volume in the Advances in Applied Microbiology series examines the microbiological aspects of Sick Building Syndrome, with an emphasis on the etiology of this phenomenon. Focusing on the mechanisms by which Sick Building Syndrome occurs, this book details the current status of technologies for the detection and identification of the causative agents.

September 2004, Hardback, 474 pp., \$119.95/£79.95/€115.00, ISBN: 0120026570

Advances in Applied Microbiology
Volume 54
Edited by Allen I. Laskin, Jean W. Bennett & Geoffrey M. Cadd

Contains 12 comprehensive reviews of current research in applied microbiology, including:

- * Bacterial Diversity in the Human Gut
- * Metabolic Yeast Fermentation Processes
- * Protozoan Grazing of Freshwater Biotin
- * Molecular biology of *Leishmania* spp. (Leishmaniasis)
- * Non-thermotolerant bacteria in complex continental populations

August 2004, Hardback, 385 pp., \$119.95/£79.95/€115.00, ISBN: 0120026562

Advances in Applied Microbiology
Volume 56
Edited by Allen I. Laskin, Jean W. Bennett & Geoffrey M. Cadd

This volume contains 12 comprehensive reviews, including:

- * Uses of *Vibrio* spp. to alkaline or ramonade soil and water pollution
- * Janomamide: chemical structure, biosynthesis, mechanism of action, resistance and applications
- * Kernel Knowledge: Smart of Corn

November 2004, Hardback, 416 pp., \$149.95/£99.95/€135.00, ISBN: 0120026589
