

School of  
**Commerce**

**Promotional DVD (Text Transcript)**  
**Presenter Mr Gerard Stone**  
**(Program Director: Bachelor of Commerce)**

- Our students are definitely more “job ready” than a lot of other graduates around Australia;
- Our students get a really solid foundation of business knowledge that allows them the opportunity to enter into any number of different careers.
- Our programs include a core of eight different subjects that allow students to test the waters of eight different areas when they first join us.
- This is good because once they find an area of interest; they can move into that area, study it as a Degree and still pick up credit for all of their previous studies.
- School of Commerce has a broad portfolio of programs, so as students have a lot of different Degrees they can choose from, this all means their career options are very wide.
- Now, that manoeuvrability allows our students a lot of flexibility. They don’t have to make their decision about which career, which business path they want to specialise in straight from high school; it gives our students a real sense of freedom.
- All of our Programs have strong ties with the industry and business and professional recognition.
- Professional recognition is the key because it means that the latest cutting edge knowledge is being constantly added to our programs at UniSA.
- We are including a large amount of mentoring, work experience, career management skills to make sure that our students can move straight into the work force.
- Truly international organisations like Coca-Cola Amatil have joined us at the School of Commerce, as part of this mentoring, as part of this work experience, with a terrific Work Practicum for our students.

- Students get an opportunity to make associations, to make contacts with people that they can form a life-long business relationship with.
- The School of Commerce definitely offers its students: choice, opportunity and careers.
