

Keynote Speakers

The Berry Street Childhood Institute is very excited to announce our inaugural **The Good Childhood Conference** is open for registrations via our website.

This multi-disciplinary conference will provide you with the opportunity to come together with sector leaders, practitioners, policy makers, researchers and young people to consider two critical questions:

- What sustains a good childhood?
- How do we best support those who have not experienced a good childhood?

The program is very rich with a range of eminent speakers from across a number of disciplines with 7 keynote speakers and 50 concurrent sessions.

Relevant sectors include but are not limited to child welfare, education, early years, health, mental health, youth justice, family violence, family support, youth, drug and alcohol and homelessness.

We also encourage young people to attend and participate in this conference.
