*Thursday 15th October 2009
4:00pm*

*Queen Victoria Lecture Theatre
Level 1, Queen Victoria Building
Women's & Children's Hospital*

*Guest Orator: Prof. Ian Gust
Professorial Fellow - University of Melbourne*

"Immunization... from Jenner to Swine Flu"

Since Jenners time, immunization has had a central role in government programs to reduce the impact of infectious diseases and been remarkably effective. While many vaccines are now available and many more are under development, the factors driving their development and utilization are becoming more complex.

Light refreshments will be served on conclusion of this meeting

Please RSVP by 2nd October 2009
