FREE SEMINAR

Urban agriculture

Presented by Elise Harris

Elise Harris completed a Bachelor of Urban and Regional Planning at UniSA in 2008, where she wrote her Honours thesis on community gardens. She works as a consultant food systems planner, an urban planner that works to create healthier, local and environmentally sustainable food systems. She received a UniSA Endeavour scholarship to undertake a student exchange in Chennai, India in the summer of 2007-2008. In 2009 she was awarded the Surbana-Singapore Institute of Planners Urban Planning Fellowship, where she lived in Singapore for a month conducting research for her report “Urban agriculture to increase food security in Singapore”.

She is passionate about politics, the environment, activism and alternative social structures. In her spare time she likes to ride her bicycle, grow food and talk to other like-minded people about radical ideas.
