

2007 COHORT MEMBERS

Dr Narelle Berry
Research Associate
School of Health Sciences

Dr Narelle Berry is a physiologist with an interest in cardiovascular physiology: in particular the ability of bioactive nutrients on vascular function to improve the cardiovascular health of individuals with obesity, hypertension and other cardiovascular disorders.

Dr Coralie English
Lecturer in Physiotherapy
School of Health Sciences

Research interests

- Stroke rehabilitation - in particular the effectiveness of circuit class therapy.

Dr Shylie Mackintosh
Senior Lecturer
School of Health Sciences

Dr Shylie Mackintosh is a physiotherapist with an interest in investigating the problem of physical mobility maintenance and rehabilitation in older people and people with neurological conditions such as stroke.

Dr Nicola Massy-Westropp
Lecturer in Occupational Therapy
School of Health Sciences

Research interests

- Hand Therapy, treatment and assessment for the hand
- Rheumatoid Arthritis
- Carpal Tunnel Syndrome
- Effectiveness of Yoga

Dr Beverly Muhlhausler

Post Doctoral Research Fellow
School of Pharmacy and Medical Sciences

Dr Beverly Muhlhausler's current research is focussed on understanding the mechanisms by which exposure to an increased nutrient supply before birth leads to an increased risk of obesity and type II diabetes after birth.

Dr Natalie Sinn

Research Associate
School of Health Sciences

Dr Natalie Sinn is researcher in the Nutritional Physiology Research Centre in the School of Health Sciences. Her background is in Psychology and she is extending her PhD research into the effects of nutrition, particularly omega-3 fatty acids, and lifestyle on mental health across the lifespan.

Dr Saravana Kumar

Lecturer
School of Health Sciences

Dr Saravana Kumar has keen interest in quality measurement and evaluation of health service delivery. His interests also include research into bridging the gap between research evidence and clinical practice. Underpinning this interest is identifying and breaking down of barriers in uptake of research evidence into clinical practice and its influence in the quality of health care service delivery.

Dr Deborah Faulkner

Research Fellow
School of Natural and Build Environments

Dr Debbie Faulkner is a population geographer with an interest in Australian demographic trends at a national, state and local level. Her specific focus at present is ageing and housing: housing careers of the older population and the baby boomers, housing options and suitability, and the relationship between ageing, housing and care options.

Dr Lin Liu

Lecturer
School of Computer and Information Science

Dr Lin Liu's research activities fall into the two broad areas: protocol verification and artificial intelligence. In particular, having been modelling and analysing Internet protocols using formal methods, and investigating on the methodologies for protocol verification; she also researched on learning algorithms of Bayesian networks, and now trying to resume my research in this area.

Dr Martin Belusko

Research Associate
School of Advanced Manufacturing and Mechanical
Engineering

Dr Martin Belusko is a mechanical engineer specialised in the area of sustainable energy in buildings. His particular area of expertise is in solar heating, thermal energy storage and low energy building design.

Dr Vivek Chanana

Senior Research Fellow
School of Computer and Information Science

Dr Vivek Chanana is a professional engineer presently associated with computer science and information systems. He is investigating data and information quality issues in organisations especially those with engineering assets.

Ms Katherine Hodgetts

Research Assistant
Hawke Research Institute

Dr Katherine Hodgetts is a social psychologist who applies critical discursive methods to the investigation of educational gender equity, and gendered constructions of academic achievement.

Dr Rosie Kerin

Lecturer
School of Education

Dr Rosie Kerin is a literacy educator with a particular interest in the impact of information communication technologies (ICTs) on pedagogy and teacher professional identity.

Dr Kathleen Connellan

Lecturer
SA School of Art

Dr Kathleen Connellan is a design theorist working in the area of colour theory and critical race theory, focusing particularly on the meaning and use of the colour white in designed environments”.

Dr Laura Dales

Lecturer
School of International Studies

Dr Laura Dales' qualifications are in the field of Asian Studies. Her research draws on sociology, anthropology, cultural studies and feminist theory, and she looks particularly at gender, feminisms, women's movements, sexuality and culture in contemporary Japan and Asia.

Dr Ruth Geer

Program Director
School of Education

Research interests

- Collaboration and interactivity in Internet-based environments
- Integration of learning technologies into the curriculum
- Learning outcomes from the use of technology-mediated interaction
- The use of learning technologies to enhance student learning at a distance
- Students' information literacy skills
- Effective management of the online environment for teaching and learning

Dr Nicole Moulding

Lecturer
School of Social Work and Social Policy

Dr Nicole Moulding is a health sociologist and my main areas of research interest are the intersections between gender and mental health, social marginalisation and mental health, and the sociology of mental health service provision.

Dr Collette Snowden

Lecturer in Public Relations
School of Communication

Research interests

- Public Relations: especially political communication, propaganda, and the relationship between public relations and the news media, international public relations
- Mobile Communications: the uses and consequences of mobile communications, and convergence with existing and emerging media.
- Telephone Communications: all aspects of the use of telephony for communication
- Non-textual Communication: oral, aural, gestural forms of communication

Dr Genevieve Baratiny

Research Fellow,
Centre for Regional Engagement

Dr Genevieve Baratiny is an epidemiologist who conducts population health research which aims to assist with the early detection, prevention and management of chronic diseases, in particular cancer, cardiovascular disease and diabetes. She is also interested the health and wellbeing of rural and Indigenous communities, the use of health services, in particular, whether they are equitable and efficient, and risk perception theory.

Dr Elvia Sunityo-Shauki

Lecturer - Financial Accounting
School of Commerce

Dr Elvia Sunityo-Shauki is an accountant who has interests in accounting education particularly on student learning outcome, as well as an interest in governance and voluntarily disclosure of the financial reporting especially for the purpose of environmental and sustainability purposes.

Dr Carl Driesener

Lecturer
School of Marketing, Ehrenberg-Bass Institute for Marketing Science

Research interests

- Modelling buyer behaviour and brand performance
- Individual use of brand image measures

Dr Freya Higgins-Desbiolles

Lecturer
School of Management

Dr Freya Higgins-Desbiolles is a critical tourism researcher interested in the sociology, ethics and politics of tourism. She has a focus upon such areas as Indigenous tourism, volunteer tourism, justice tourism and peace through tourism in my recent work and she is interested in how tourism can be directed to social and ecological ends.

Dr Jill Dorrian

Lecturer
School of Psychology and Centre for Sleep Research

Dr Jill Dorrian is a research psychologist who investigates the role of sleep in human functioning: in particular, the changes in safety and productivity resulting from sleep loss in shiftworking populations.
