Computer and
Information
Science, Bachelor
of Management;**
graduated 2002

**Bachelor of
Business (Honours),**
graduated 2003

**PhD Business and
Management,**
graduated 2005

When Jing Gao moved to South Australia to study in 1997, he was prepared for a life-changing experience. Now, eight years and four UniSA degrees later, it's proven so rewarding that he's staying in Adelaide to pursue a promising research career.

While UniSA was Jing's first choice because it provided the state's only double degree in Computer and Information Science and Management, he soon discovered a range of other benefits available to students.

"UniSA has a lot of industry links and offers great flexibility in terms of study," he says. "Many staff members have worked in industry too, so they have practical experience and can offer valuable assistance to students.

"Also, from what I've seen, UniSA has excellent facilities compared to other universities – it has the latest equipment, and very convenient access to the internet and the library's online database."

It hasn't been all work and no play for Jing, though. While completing his studies in record time, he also managed to become President of the Chinese Students Association and found time to indulge his love of badminton and tennis at the Magill campus' sports centre.

Having finished his PhD research into human activity problem solving and now working as a university lecturer, Jing says he has gone above and beyond what he expected to do when he began his undergraduate studies at UniSA.

"I didn't ever think I would be doing all these things," says Jing. "If you're looking for a career, flexibility, and for more applied and practical rather than theoretical study options, come to UniSA – it's a young, passionate and energetic university."

fast facts China
