**"Designing Markets for Environmental Goods when
Uncertainty About Outcomes is Embraced"**

Professor James S. Shortle

James' research interests are primarily in the area of environmental and natural resource economics. Some topics he is currently working on include:

- integration of economic and environmental information for environmental decision making;
- decision making under uncertainty;
- economic incentives for environmental management (especially water quality trading);
- impacts of climate change on natural hazards, agriculture, human health and water resources;
- management of agricultural externalities

Date: Wednesday 11 April 2007
Venue: GK4-30, City West campus
Start Time: 12.00 PM
Finish Time: 1.00 PM
