

**Guidelines International Network 2014 Conference
Guideline Contextualisation Workshop _ Contextualisation**

Task 1: Extract one recommendation from the two guidelines, which are on the same context of care (e.g., recommendation on exercise for hypertensive individuals)

Guidelines	Recommendation	Reference
Guideline 1		
Guideline 2		

Based on the extraction , what is the :	
• CONSISTENCY OF EVIDENCE LEVELS	
• VOLUME OF REFERENCES	
• AGE OF REFERENCES	
• UNIFORMITY OF THOUGHT	

****Refer to Philippine Academy of Rehabilitation Medicine Level of Evidence Guide*

Task 2: Write the level of evidence and the recommendation based on the level of evidence

Level of Evidence:	
Recommendation:	

****Refer to Philippine Academy of Rehabilitation Medicine guide for summarizing the strength of evidence*

Presenters:

Karen Grimmer, Janine Margarita Dizon, Consuelo Gonzalez-Suarez

Task 3: Formulate the context points for your recommendation

Context considerations	Minimum standard care of practice	Additional standard care of practice
Practice method		
Equipment		
Workforce		
Training		
When is it done		
Reassessment using at least one standard outcome measure
